Dengue Fever Outbreak Situation Report in Samoa

Epi-week 18: 29 April—05 May 2024

Issue No.10

Date of report: 06 May 2024

Email: surveillance@health.gov.ws

Prepared by: Health Security & Disease Surveillance Division

Phone contact: +685 66506/66507

Highlights

- ◆ To date, a total of 342 lab-confirmed dengue cases have been recorded since November 2023
- ◆ Recorded 44 new lab-confirmed dengue cases in this epiweek
- ◆ No dengue-related death has been recorded to date
- ◆ Majority of the cases are those under 10 years and over 60 years old
- ◆ Dengue cases are densely distributed in the Apia Urban Area (AUA) and North West of Upolu (NWU) regions

Figure 1. Number of dengue lab-confirmed cases by date of test request, November 2023 to date

Case definition

Suspected case (clinical case definition):

- ⇒ Acute fever $\geq 38.0^{\circ}\text{C}$ for at least 2 days, AND two or more of the following: Anorexia and nausea; Aches and pains; Rash; Low white blood cell count; Warning signs, including: Abdominal pain or tenderness, Persistent vomiting, Mucosal bleeding, Liver enlargement $>2\text{cm}$ below costal margin, Clinical evidence of fluid accumulation, Lethargy, restlessness, Laboratory: increase in hematocrit, rapid decrease in platelet count

⇒ Confirmed case

Isolation of dengue virus or detection of dengue-specific antigen or antibodies in tissue, blood, CSF or other body fluid by an advanced laboratory test

Figure 2. Age group distribution of dengue lab-confirmed cases by sex, November 2023 to date

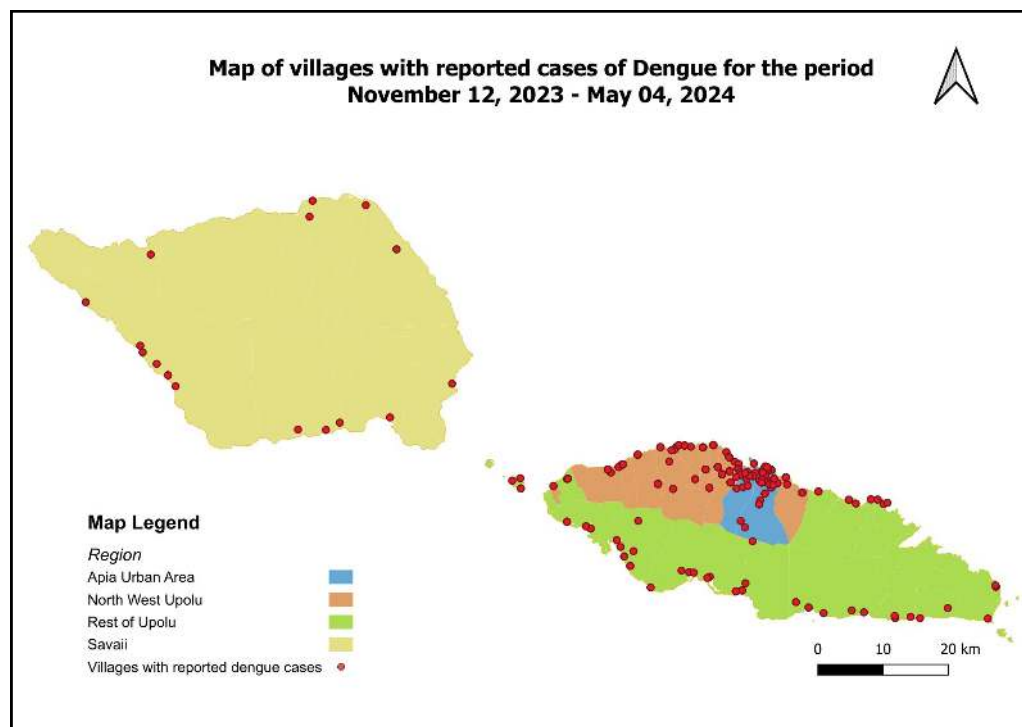

Figure 3. Density map of lab-confirmed dengue cases by village, November 2023 to date

Sex	No. cases	%
Females	167	49%
Males	175	51%
Total	342	100%

Control Measures:

1. Conduct spraying to eliminate adult mosquitoes at hot spot areas (Apia area and north west of Upolu)
2. Boost community engagement on source reduction
3. Risk communication on dengue preventative measures on all media outlets
4. Ongoing collaboration with other sectors on dengue awareness and prevention

Recommendation for the public:

1. Continue to clean up and remove all stagnant water sources around the house to ensure mosquito breeding sites are eliminated
2. Wear appropriate clothing to minimize mosquito bites
3. Use mosquito nets and repellents such as lotion and spray
4. If you are affected, watch out for severe symptoms, and seek medical attention immediately. Monitor other people in the household for similar symptoms and present to the hospital for testing and health advice.

- For medical advice, please contact the Ministry of Health on +685 68100 or +685 66600, or visit the nearest hospital
- Dengue situational reports are posted on the MOH Facebook page and MOH website: www.health.gov.ws
