## Dengue Fever Outbreak Situation Report

Epi-week 17: 22—28 April 2024

Issue No.9

**Date of report:** 29 April 2024

**Email:** [surveillance@health.gov.ws](mailto:surveillance@health.gov.ws)

**Prepared by:** National Health Surveillance & IHR Division

**Phone contact:** +685 66506/66507

### Highlights

- ♦ A total of 298 lab-confirmed dengue cases have been recorded since November 2023
- ♦ In this epiweek, 48 new lab-confirmed dengue cases were recorded
- ♦ To date, no dengue-related death has been recorded
- ♦ Majority of the cases are those under 10 years and over 60 years old
- ♦ Dengue cases are densely distributed in the Apia Urban Area (AUA) and North West of Upolu (NWU) regions

**Figure 1. Number of dengue lab-confirmed cases by date of test request, November 2023 to date**

### Case definition

#### Suspected case (clinical case definition):

- ⇒ Acute fever  $\geq 38.0^{\circ}\text{C}$  for at least 2 days, AND two or more of the following: Anorexia and nausea; Aches and pains; Rash; Low white blood cell count; Warning signs, including: Abdominal pain or tenderness, Persistent vomiting, Mucosal bleeding, Liver enlargement  $>2\text{cm}$  below costal margin, Clinical evidence of fluid accumulation, Lethargy, restlessness, Laboratory: increase in hematocrit, rapid decrease in platelet count

#### ⇒ Confirmed case

Isolation of dengue virus or detection of dengue-specific antigen or antibodies in tissue, blood, CSF or other body fluid by an advanced laboratory test

**Figure 2. Age group distribution of dengue lab-confirmed cases by sex, November 2023 to date**

Sex	No. cases	%
Females	146	49%
Males	152	51%
<b>Total</b>	<b>298</b>	<b>100%</b>

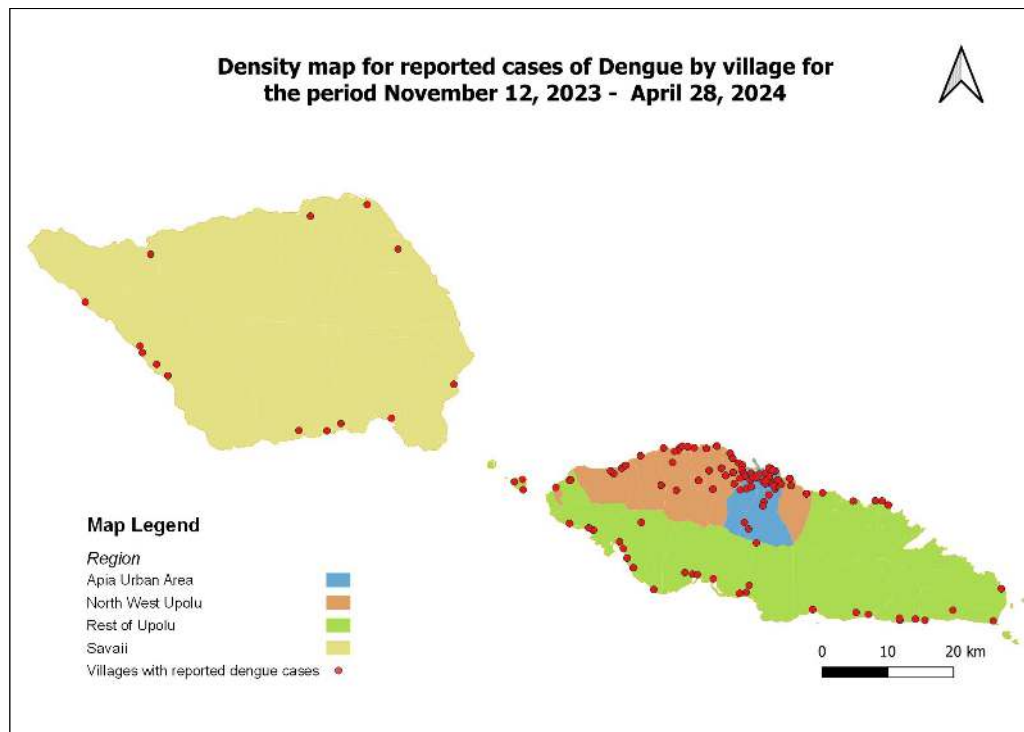

#### Control Measures:

1. Conduct spraying to eliminate adult mosquitoes at hot spot areas (Apia area and north west of Upolu)
2. Boost community engagement on source reduction
3. Risk communication on dengue preventative measures on all media outlets
4. Ongoing collaboration with other sectors on dengue awareness and prevention

#### Recommendation for the public:

1. Continue to clean up and remove all stagnant water sources around the house to ensure mosquito breeding sites are eliminated
2. Wear appropriate clothing to minimize mosquito bites
3. Use mosquito nets and repellents such as lotion and spray
4. If you are affected, watch out for severe symptoms, and seek medical attention immediately. Monitor other people in the household for similar symptoms and present to the
